Node.js  
PHP  
jQuery  
HTML  
CSS  
Tailwind CSS  
SQL  
MongoDB  
RESTful APIs

### WORK EXPERIENCE

#### Full-Stack Developer

Asty

January 2022 - April 2023 / Sulaymaniyah, Iraq

- Developed and maintained scalable full-stack applications using technologies such as React.js, Node.js, and MongoDB.
- Implemented responsive and intuitive user interfaces utilizing HTML, CSS, and JavaScript frameworks, resulting in enhanced user experiences.
- Designed and optimized back-end APIs and database schemas for efficient data retrieval and manipulation.
- Conducted thorough testing, debugging, and performance optimization to ensure the stability and reliability of the applications.
- Conducted code refactoring and optimization to improve code quality, maintainability, and scalability of existing applications.

#### Backend Developer

Kurdistan Vending

August 2021 - November 2021 / Sulaymaniyah, Iraq

- Developed and implemented robust API endpoints to enable seamless communication between multiple vending machines, ensuring efficient and secure data exchange.
- Integrated Fastpay API into our vending machine system, enabling seamless QR code-based transactions and enhancing the overall user experience.
- Implemented a customer data database for vending machine transactions, enabling effective tracking of purchase histories and providing valuable insights into consumer behavior.
- Monitored and analyzed server logs and performance metrics to identify and resolve issues, ensuring optimal application performance and uptime.
